EDUCATION

Cooperative College of Moldova
Accounting
2019 – 2023

COURSES

Decor-Still, Interior Design School
Course from design fundamentals to AutoCAD and 3ds Max
2022

SKILLS

- SketchUp (Dynamic Components)
- Enscape, LayOut
- Testing software and modules, defect reporting
- Remote technical support
- Video: OBS Studio, Movavi Video Editor
- AI: ChatGPT, Claude

Used previously, basic level

- AutoCAD, 3ds Max
- Corona Renderer
- Photoshop, GIMP

LANGUAGES

- Romanian (native)
- Russian (fluent)

PROFESSIONAL PROFILE

Furniture and interior designer with about 3 years of experience. I carry out custom furniture projects, from on-site measurements to visualisation. I was part of the development team of an interior and furniture design software: I created over 200 parametric modules for its library in SketchUp Dynamic Components. I was responsible for testing and gave presentations of the software to clients in Moldova, Uzbekistan, Kazakhstan and Georgia.

PROFESSIONAL EXPERIENCE

Furniture and Interior Designer — 2024 – 2026

Software company developing an interior and furniture design application, Chișinău

Interior and furniture design

- Delivered custom interior and furniture projects for clients, from identifying requirements and on-site measurements to design, renderings and dimensioned drawings.
- Developed the interior concept and renderings for an exhibition project in Dubai (kitchen, living room, bedroom) in two stylistic directions; created the 360° panoramas and the VR tour together with the team.

Parametric module library

- Adapted over 200 parametric modules of cabinet furniture (kitchens, bedrooms, hallways, bathrooms) from 18 mm to 16 mm chipboard, the standard of clients in Kazakhstan.
- Designed bathroom furniture and bedside tables in 16 mm and 18 mm versions, and configured the modules so that dimensions, materials, fronts and LED lighting adapt automatically; coordinated technical solutions with the production technologist.
- Configured sofas and beds for the software library (dimensions, materials, colours) so that they appear automatically in the project's price calculation.

Testing, training and support

- Tested modules and new features developed by colleagues before release: documented defects and verified fixes, with improvement proposals, so that users receive a correctly working program.
- Gave detailed presentations of the software to clients in Moldova, Uzbekistan, Kazakhstan and Georgia: how it works and what it can do.
- Trained new colleagues and users in Moldova, online and in person, providing technical support with installation, licence activation and day-to-day use of the program.
- Developed the structure and scripts of a 22-lesson video course on the company's software for interior and furniture designers; prepared the demo projects, filmed and edited the lessons in Romanian. The structure was kept in the updated edition of the course.

Furniture Designer (freelance) — 2023

Occasional projects for the clients of a custom furniture manufacturer

- Prepared technical drawings and furniture renderings in AutoCAD and 3ds Max to present solutions to clients before production.
